

Let Clover take care of your online ordering and processing. **You do the rest.**

Clover Online Ordering services makes it easy for people to order online anywhere they discover you – an ordering web page created for you by Clover or the Clover app.

Easy to set up and get started

We build an online ordering page for your business. You can link it to your website or use it as a standalone web page. The order page will automatically appear in the Clover app.

No subscription or setup fees

The only fees that apply are the card-not-present (CNP) rates typically associated with online orders.

You control your ordering menu

Your Clover-powered web page and the Clover app automatically sync with your Clover menu. This allows you to manage a single menu for both in-restaurant and online transactions.

Nurture your loyal customers

The Clover app allows you to integrate reward, promotion, and feedback programs to attract and reward your most loyal customers and attract new ones.

Secure processing through Clover

From online order placement to payment and food pickup, Clover takes care of the entire process.

Ready to get started?

- Prepare your menu for online orders on the Clover Dashboard
- Confirm your business and operational information
- Tell the world you're open for business online!
- Watch online orders flow in ... and fulfill them
- Maximize your incoming online orders by signing up for The Ordering.app too
